Why is it executives with great pedigree, great work ethic and great products lead teams that often under perform? Why is it some without the advantages of others seem to outperform the competition, get promoted more rapidly with far greater results? The answer is like most answers, it is right in front of your nose, but from an early age we have been socialized to ignore it to ensure acceptance. Once you have read through this articulate and inviting short work, you will be surprised this has not been driven home before...and once you understand this key piece to success both you and your company will be far more impactful and effective. The authors present, in a very down to earth and compelling manner the insights they have from distinctly different perspectives. One is a leading consultant who brings the unusual combination of a traditional MBA with a Ph.D. in clinical psychology. The second is an individual who was promoted through the ranks of one of America's best led Multi-national corporations to the role of president and COO. Any aspiring executive and indeed any current executive looking to hone their route to success will find this delightfully written book with its many examples a refreshing, if counter-intuitive look in the mirror. And if you are like most, will say "I knew that, and it gave me a powerful reminder of a basic principle responsible for many of the issues I face in my business and personal life."

Recognized as the patriarch of the minimalist movement--Brian Eno once called him "the daddy of us all"--La Monte Young remains an enigma within the music world, one of the most important and yet most elusive composers of the late twentieth century. Early in his career Young almost completely eschewed the conventional musical institutions of publishers, record labels, and venues, in order to create compositions completely unfettered by commercial concerns. Yet at the same time he exercised profound influence on such varied figures as Terry Riley, Cornelius Cardew, Andy Warhol, Yoko Ono, David Lang, The Velvet Underground, and entire branches of electronica and drone music. For half a century, he and his partner and collaborator, Marian Zazeela, have worked in near-seclusion in their Tribeca loft, creating works that explore the furthest extremes of conceptual audacity, technical sophistication, acoustical complexity, and overt spirituality. *Draw A Straight Line and Follow It: The Music and Mysticism of La Monte Young* stands as the first narrative study to examine Young's life and work in detail. The book is a culmination of a decade of research, during which author Jeremy Grimshaw gained rare access to the composer and his archives. Loosely structured upon the chronology of the composer's career, the book takes a multi-disciplinary approach that combines biography, musicology, ethnomusicology, and music analysis, and illuminates such seemingly disparate aspects of Young's work as integral serialism and indeterminacy, Mormon esoterica and Vedic mysticism, and psychedelia and psychoacoustics. *Draw A Straight Line and Follow It* is a long-awaited, in-depth look at one of America's most fascinating musical figures.

La Monte Young is one of America's most important living composers, but his esoteric compositional methods and reclusive personality have prevented in-depth scholarly examination of his life and work. This book draws on rare access to the composer and his archives to tell the story of one America's most enigmatic artists.
