Linear Algebra Igor

Yanovsky, 2005 5

Theorem. V and W are isomorphic, there is a

bijjective linear map $L: V \rightarrow$

W . Proof.) If V and W

are isomorphic we can

find linear maps $L: V \rightarrow$

W and $K: W \rightarrow V$ so that

$LK = I_W$ and $KL = I_V$.

Then for any $y = I_W(y)$

$= L(K(y))$ so we can let x

$= K(y)$, which means L is

onto. If $L(x_1) = L(x_2)$

Acces PDF

Advanced

then $x_1 = IV(x_1) =$

$KL(x_1) = KL(x_2) = IV$

$(x_2) = x_2$, which means L

is $1 \leq 1$.
