REDEFINING THE PRACTICE OF ARCHITECTURE CLIENT • BUSINESS • DELIVERY • SERVICES This second companion volume to the Thirteenth Edition of The Architect's Handbook of Professional Practice brings architects and others working in the architectural community up to date on the current state of the practice, from important issues affecting day-to-day operations and emerging business trends to the latest AIA contract documents. The three sections of this easy-to-use reference present accessible, field-tested knowledge on running a successful business: Practice reports– Read real-world reports from practitioners in the field, including a survey of client decision makers in the health care sector describing how these clients perceive services performed by architects. Learn from firms that are striking out in new directions by blending expanded services with core design offerings. Find out how to attract new business by making your firm more environmentally conscious, and see how the power of digital technology can transform the traditionally segmented project delivery process. Practice topics– Add practical techniques for uncovering client and user needs to your practice arsenal. Discover the distinctive aspects and challenges of small projects in small practice settings. Enhance your knowledge of managing multiple offices, keeping key staff, and maintaining the intent and quality of your project designs. Gain an understanding of expert witnesses and facility evaluation services. AIA contract documents– Find out what's new in the AIA documents program and update your files with an accompanying CD-ROM containing all existing, revised, and new AIA contract documents.

The Managing Change is to introduce the tools, techniques and methodologies, deemed appropriate to identifying, documenting and otherwise managing change that have been identified as being " best tested and proven" practices and which have been found to work on " most projects, most of the time" ; provide a logical or rational sequence showing when those tools or techniques would normally and customarily be used and in selected instances, show how to use those tools/techniques and/or where to find additional information on how to use or apply them.

The procedures in this manual distill six years of learning about the most efficient acquisition and construction methods in this country for high volume production of housing affordable to low-income people. The people in the Rehab Work Group at The Enterprise Foundation have gathered this information first-hand and conveyed it in training workshops on production management throughout the country. Over 2000 participants in the workshops have included rehab specialists from city housing departments, con struction managers of single and multifamily rehab projects, program managers from both nonprofit housing development organizations and city rehab depart ments, as well as students in colleges and universities. They are becoming the backbone of a new cadre of effective producers of affordable housing. In the 30 cities and several rural areas where we have both learned and applied these production management techniques, they have resulted in savings of 5. 10, even 25 percent of the cost of housing development. The Enterprise Foundation is a national, nonprofit organization that my wife Patty and I launched in 1982. The Foundation's mission is to see that all very low-income Americans have the opportunity for fit and affordable housing within a generation, and work their way up and out of poverty into the main stream of American life.
