of the exam. The most exciting part of this book is that we are selling it as a BLACKLINE MASTER with a single teacher license. This means that when you purchase a copy you will be free to make paper copies for all of your students! The license only extends to a single teacher and their students. Multiple teachers at the same school will need to buy separate copies for each teacher.

The Rainbow is a novel by British author D. H. Lawrence, first published in 1915. It follows three generations of the Brangwen family living in Nottinghamshire, [2] particularly focusing on the individual's struggle to growth and fulfilment within the confining strictures of English social life. Lawrence's 1920 novel Women in Love is a sequel to The Rainbow

REA's AP Environmental Science Crash Course is the first book of its kind for the last-minute studier or any AP student who wants a quick refresher on the course. /Written by an AP Environmental Science teacher, the targeted review chapters prepare students for the test by only focusing on the important topics tested on the AP Environmental Science exam. /The easy-to-read review chapters in outline format cover everything AP students need to know for the exam: human population dynamics, managing public lands, energy conservation, changes in Earth's climate, species extinction, loss of biodiversity, and more. The author also includes must-know key terms all AP students should know before test day. /With our Crash Course, students can study the subject faster, learn the crucial material, and boost their AP score all in less time. The author provides key strategies for answering the multiple-choice questions, so students can build their point scores and get a 5!

The world's population is now 7.4 billion people, placing ever greater demands on our natural resources. As we stand witness to a possible reversal of modernity's positive trends, Malthus's pessimism is worth full reconsideration. This Norton Critical Edition includes: • An introduction and explanatory annotations by Joyce E. Chaplin. • Malthus's Essay in its first published version (1798) along with selections from the expanded version (1803), which he considered definitive, as well as his Appendix (1806). • An unusually rich selection of supporting materials thematically arranged to promote classroom discussion. Topics include "Influences on Malthus," "Economics, Population, and Ethics after Malthus," "Malthus and Global Challenges," and "Malthusianism in Fiction." • A Chronology and a Selected Bibliography.

Destruction of habitat due to urban sprawl, pollution, and deforestation has caused population declines or even extinction of many of the world's approximately 2,600 snake species. Furthermore, misconceptions about snakes have made them among the most persecuted of all animals, despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests. It has become increasingly urgent, therefore, to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability. In the first book on snakes written with a focus on conservation, editors Stephen J. Mullin and Richard A. Seigel bring together leading herpetologists to review and synthesize the ecology, conservation, and management of snakes worldwide. These experts report on advances in current research and summarize the primary literature, presenting the most important concepts and techniques in snake ecology and conservation. The common thread of conservation unites the twelve chapters, each of which addresses a major subdiscipline within snake ecology. Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered. Each chapter provides an essential framework and indicates specific directions for future research, making this a critical reference for anyone interested in vertebrate conservation generally or for anyone implementing conservation and management policies concerning snake populations.
