Behavioral Forensics: Using Applied Behavior Analysis in Psychological Court Evaluations presents the first compendia on the application of behavioral principles for the assessment and analysis of criminal behavior in court-ordered psychological evaluations. The book explains criminal motivation, risk behaviors, custody, criminal responsibility, and competence to stand trial. BFA employs principles and techniques of standard behavioral assessment in deducing causal evidence from interview and psychometric data. Sections cover evidence-based concepts and principles of BFA vs. obsolete forensic evaluation models, also including ten case studies that illustrate BFA in pre and post-sentencing evaluations that demonstrate how to determine risk of criminal recidivism or competency. Considering the unprecedented numbers of psychologists turning to forensic work and influx of graduate programs offering degrees in criminal behavior analysis, this book is a timely resource for a variety of readers. Presents the advantages of using Behavioral Forensic Assessment (BFA) over personality theories Explains criminal motivation, risk behaviors, custody, criminal responsibility and competence to stand trial from a natural science (behavioral and interbehavioral) perspective Includes case studies that illustrate BFA in pre-sentencing and post-sentencing evaluations Offers the most scientific, evidence-based approach to criminal (forensic) psychological evaluations

- One volume-reference work with approximately 250 entries, organized alphabetically for ease of use and of locating subject matter. Each entry will contain 5-8 references as well as a bibliography of references and suggested readings - An authoritative reference text on school psychology that would appeal to, and be understood by, a broad audience. - Will assist individuals in acquiring a general understanding of some of the theories, practices, and language associated with the field of school psychology

First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.
Offers a review of current knowledge in the field of functional assessment of behavior, and discusses the use of such data in designing behavioral support programs. Illustrative examples of strategies for the use of communication training to alter problem behavior are given, including points of controversy and areas where further work is needed. Of interest to speech-language pathologists, psychologists, educators, researchers and graduate students in these fields. Annotation copyright by Book News, Inc., Portland, OR
With Dougherty's PSYCHOLOGICAL CONSULTATION AND COLLABORATION IN SCHOOL AND COMMUNITY SETTINGS, 6th Edition, you will see how human service professionals help others work more effectively to fulfill their work-related or caretaking responsibilities to individuals, groups, organizations, and communities. This practical book uses a proven generic model for application, surveys various approaches to consultation, examines the organizational context of consultation, and reviews the numerous ethical and professional challenges that today's consultants face. As you work through the book, you can develop or refine your own personal model of consultation. Case studies bring concepts to life and help you learn how to deliver services most effectively. This edition includes new content aligned with CACREP and other standards, an increased focus on school-based consultation, new material on cultural diversity, advocacy, social justice, prevention, systems theory, and ecological variables as they affect consultation and collaboration in counseling and psychology, and much more to help you prepare for professional success. Available with InfoTrac Student Collections http://goengage.com/infotrac.
