## *Answer Key Chapter*

Chapter Review. The life of cell consists of stages that make up the cell cycle.

After a cell is born, it passes through an interphase before it is ready to replicate itself and produce

# Access PDF Cell Growth And Division Chapter 10

Answer Key  
daughter cells. This interphase includes two gap phases (G1 and G2), as well as an S phase, during which its DNA is replicated in preparation for cell division.

# Acces PDF Cell Growth And Division Chapter 10

## 3.5 Cell Growth and Division - Anatomy & Physiology

The two major phases of the cell cycle include mitosis (cell division), and interphase, when the cell grows and performs all of its normal functions.

# Access PDF Cell Growth And Division Chapter 10

Interphase is further subdivided into G<sub>1</sub>, S, and G<sub>2</sub> phases. After the synthesis phase, the cell proceeds through the G<sub>2</sub> phase.
