CIBSE Guide B - Heating, Ventilating, Air Conditioning and Refrigeration. During 2001 and 2002, a completely new edition of CIBSE Guide B was published in the form of five separate 'stand alone' books. In 2004, the decision was taken to produce Guide B as a single volume and this publication is the result. The technical content of this combined volume is the same as the five separate sections, with only minor editing to correct errors and to remove obvious duplication between sections.

The energy efficiency of gas-burned boilers in space heating systems is sensitive to how the boiler is controlled. This study is aimed to investigate how the overall energy performance of a heating system can be optimized using best boiler control scheme. This is to be achieved through experimental studies and simulation studies. This paper presents the latter.
