Gas and dual-fuel range cookers will need to be installed by a Gas Safe-registered engineer. Electric range cookers - these have electric hobs and ovens. Most will have one or more ovens with a fan, which helps to spread the heat around the oven. If your oven has a fan, it's going to heat up more quickly - this means cooking temperatures and times will be shorter. Electric induction range cookers - these have induction hobs rather than conventional electric ceramic hobs, which means they ...

RangeBuyingGuide · Gas Advantage

Gas ranges require, well, gas. You will need to have a gas line hook-up for this type of range. Alongside the gas connection, the range will also need electricity in order to power the internal components and create a spark for the gas to ignite. Gas ranges require a standard 110v to operate properly.
