The term “Guided Discovery” refers to a teaching and learning environment where students are actively participating in discovering knowledge. The goal of discovery is to facilitate deep learning on the part of the students - learning that has its basis in fundamental understanding and often arises from viewing a problem from multiple perspectives. The pedagogical underpinning is that if the students discover the knowledge, they will, in the process, have created and added to their own ...

*Guided Discovery as a Teaching Method | Open Learning*

Guided discovery, also known as an inductive approach, is a technique where a teacher provides examples of a language item and helps the learners to find the rules themselves. Example. The learners are shown a problem page containing various examples of the second conditional 'If I were you,....'. They identify the structure and then the rules for making it.

many theories to explain how individuals learn, i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest (such as motivation, cognition, metacognition etc.) and it is fascinating to see the various mainstreams of learning, remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can
