Chronicles American foreign relations literature from colonial times to the present, with updated material on post World-War II.

The Guide to the Presidency is an extensive study of the most important office of the U.S. political system. Its two volumes describe the history, workings and people involved in this office from Washington to Clinton. The thirty-seven chapters of the Guide, arranged into seven distinct subject areas (ranging from the origins of the office to the powers of the president to selection and removal) cover every aspect of the presidency. Initially dealing with the constitutional evolution of the presidency and its development, the book goes on to expand on the history of the office, how the presidency operates alongside the numerous departments and agents of the federal bureaucracy, and how the selection procedure works in ordinary and special circumstances. Of special interest to the reader will be the illustrated biographies of every president from Washington to the present day, and the detailed overview of the vice-presidents and first ladies of each particular office. Also included are two special appendices, one of which gathers together important addresses and speeches from the Declaration of Independence to Clinton's Inaugural Address, and another which provides results from elections and polls and statistics from each office.

This 2-volume work includes approximately 1,200 entries in A-Z order, critically reviewing the literature on specific topics from abortion to world systems theory. In addition, nine major entries cover each of the major disciplines (political economy; management and business; human geography; politics; sociology; law; psychology; organizational behavior) and the history and development of the social sciences in a broader sense.

The first comprehensive study in English of the Soviet propaganda artist Aleksandr Zhitomirsky, who conceived and deployed his striking photomontages as a political weapon The leading Russian propaganda artist Aleksandr Zhitomirsky (1907-1993) made photomontages that were airdropped on German troops during World War II. He later worked for Pravda and other leading publications, satirizing American politics and finance from the Truman through the Reagan eras and educating his public about Egypt, South Africa, Vietnam, and Nicaragua as well. Zhitomirsky favored the grotesque and the eye-catching. His villainous menagerie included Reichminister Joseph Goebbels as a distorted simian and an airborne scorpion outfitted with an Uncle Sam hat. In this comprehensive, image-driven account of Zhitomirsky's long career, Erika Wolf explores his connections to and long friendship with the German artist John Heartfield, whose work inspired his own. Wolf also examines more than 100 of Zhitomirsky's photomontages and translates excerpts from his one published book, *The Art of Political Photomontage: Advice for the Artist* (1983). In an era when satirical photomontage thrives on the Internet and propaganda has reasserted itself in America and Russia alike, this study of a once-prominent yet internationally undiscovered artist is more than timely.

Foreign Policy is unique in that it combines theories, actors and cases in one volume. This approach encourages the reader to appreciate a balanced view of the theory, and how foreign policy is carried out in the real world.

Theodore Draper is one of America's most trenchant and informed critics. A Present of Things Past gathers together ten of his most recent and most powerful selected essays, in which Draper, with his customary acuity and wit, tackles a host of issues that define America's political culture. A Present of Things Past is concerned with a reexamination of the Second World War in both its military and its political aspects; the trajectory of American conservatism as it manifested itself during the Reagan years; the rise of Gorbachev and the history of "reform" in the Soviet Union; the revisionist debate over the origins and history of American communism; and the persistent mystery of a man named Max Eitingon, who was, depending on one's reading of the sources, either an important figure in the history of psychoanalysis or an agent of the Soviet secret police, or both. In "American Hubris," Draper illuminates the assumptions that have guided American foreign policy in the postwar period, and concludes that our costly misadventures--in Korea, Vietnam, Lebanon, and elsewhere--cannot be considered a string of aberrations. They were, he argues, a consequence of the Truman Doctrine. In "Reagan's Junta," Draper observes: "This is supposed to have been the era of the imperial presidency. It has turned out to be the era of presidencies that have tried to make themselves imperial--and failed." Throughout these compelling essays, Draper demonstrates the uses and abuses to which history has been put by ideologues of both the left and the right. He finds unacceptable, for example, the practice of many journalists of fictionalizing their sources. The New York Times has called Draper "one of the clearer-eyed observers of the issues that torment us." A Present of Things Past enhances that reputation.

Readings in American Foreign Policy delivers a contemporary introduction to America's role in world affairs. Serving either in a standalone capacity or as a supplementary reader for undergraduate American foreign policy courses, Hasted's new volume focuses on the most current problems and how to interpret them. Readings are divided into six parts and each part opens with an introductory essay providing students with a historical framework and "big picture" questions to guide comprehension. Each part incorporates a variety of sources, including not only articles from the most popular journals worldwide, but lesser known government documents and think tank pieces. By exposing students to a unique array of government policies and debates, Readings in American Foreign Policy prompts students to analyze policymaking from multiple perspectives and to develop their own strategies toward evaluating policy positions.

Collective Traumas is about the traumatic European history of the 20th century - war, genocide, dictatorship, ethnic cleansing - and how individuals, communities and nations have dealt with their dark past through remembrance, historiography and legal settlements. Memories, and especially collective memories, serve as foundations for national identities and are politically charged. Regardless whether memory is used to support or to challenge established ideologies, it is inevitably subject to political tensions. Consequently, memory, history and amnesia tend to be used and abused for different political and ideological purposes. From the perspectives of historical, literary and visual studies the essays focus on how the experiences of war and profound conflict have been represented and remembered in different national cultures and communities. This volume is a vital contribution to memory studies and trauma theory. Collective Traumas is a result of the multidisciplinary research project on Memory Culture that was initiated in 2002 at Karlstad University, Sweden. A previous publication with Peter Lang is Memory Work: The Theory and Practice of Memory (2005).
