I use this to illustrate the cool logic abilities of MyOpenLab. On the right side of the firmata block I invert the buttons since they are active low and then feed the result to an RS flip flop.

Easy GUI Front Ends For Arduino, Rasberry Pi, And More With MyOpenLab

The war of the currents was fairly decisively won by AC. After all, whether you've got 110 V or 230 V coming out of your wall sockets, 50 Hz or 60 Hz, the whole world agrees that the frequency ...
