5 Electricity. Needless to say, electricity will always remain on the top of the inventions that the world has ever offered. Well let's be precise, electricity was not really invented, but rather discovered because it has existed ever since the globe was brought into being, but it just took one brilliant person to unravel the treasure of this world, and everyone on this planet is actually ...

Top 10 Best Inventions That Changed The World | TopTeny.com

Among the most-consequential inventions of the late Industrial Revolution were the internal-combustion engine and, along with it, the gasoline-powered automobile. The automobile, which replaced the horse and carriage in Europe and the United States, offered greater freedom of travel for ordinary people, facilitated commercial links between urban and rural areas, influenced urban planning and the growth of large cities, and contributed to severe air-pollution problems in urban areas.
