This collection of eleven essays presents studies of ancient Egyptians arranged by social type - slaves, craftsmen, priests, bureaucrats, the pharaoh, peasants and women, among others.

Due to its speed, low energy requirements, and the fact that it does not require a pre-drilled hole, the technique of self-piercing riveting (SPR) has been increasingly adopted by many industries as a high-speed mechanical fastening technique for the joining of sheet material components. Self-piercing riveting comprehensively reviews the process, equipment, and corrosion behaviour of self-piercing riveting, and also describes the process of evaluation and modelling of strength of self-piercing riveted joints, quality control methods and non-destructive testing. Part one provides an extensive overview of the properties of self-piercing riveting. Chapters in this section review the mechanical strength, fatigue, and corrosion behaviour of self-piercing riveted joints. The second part of the book outlines the processing and applications of SPRs, and describes the dynamic strength evaluation/crashworthiness of SPRs, and the modelling of strength of self-piercing riveted joints, before going on to discuss the assessment of the suitability of materials for self-piercing riveting. The concluding chapters describe the quality control and non-destructive testing of self-piercing riveted joints, optimization of the strength of self-piercing rivets, and provides an overview of self-piercing rivets in the automotive industry and the applications of self-piercing riveting in automated vehicle construction. Self-piercing riveting is a standard reference for engineers and designers in the aerospace, materials, welding, joining, automotive and white goods industries, as well as manufacturers of metal components for the automotive, aerospace, white goods and building industries. Comprehensively reviews the process, equipment, and corrosion behaviour of self-piercing riveting Describes the process of evaluation and modelling of strength of self-piercing riveted joints, quality control methods and non-destructive testing Provides an overview of quality, optimization, applications and strength evaluations of self-piercing riveting

Heading to New York to help a friend who has gotten into trouble for kidnapping five abused children, Will Rees and Lydia encounter more challenges than anticipated when the children's mother is killed and their friend is accused. By the award-winning author of Death of a Dyer. 25,000 first printing.

Completely revised to reflect the new ACI 318-08 Building Code and International Building Code, IBC 2009, this popular book offers a unique approach to examining the design of prestressed concrete members in a logical, step-by-step trial and adjustment procedure. KEY TOPICS: Integrates handy flow charts to help readers better understand the steps needed for design and analysis. Includes a revised chapter containing the latest ACI and AASHTO Provisions on the design of post-tensioned beam end anchorage blocks using the strut-and-tie approach in conformity with ACI 318-08 Code. Offers a new complete section with two extensive design examples using the strut-and-tie approach for the design of corbels and deep beams. Features an addition to the elastic method of design, with comprehensive design examples on LRFD and Standard AASHTO designs of bridge deck members for flexure, shear and torsion, conforming to the latest AASHTO specifications. Includes a revised chapter on slender columns, including a simplified load-contour biaxial bending method which is easier to apply in design, using moments rather than loads in the reciprocal approach. MARKET: A useful construction reference for engineers.

Who are the Europeans? How do they think? What values do they hold dear? What binds them and what divides them? This atlas summarizes the outcomes of the European Values Study, combined with results from the World Values Survey, two projects that have measured values over the past three decades. The

European Values Study project is run by researchers from 33 countries and is administered by Tilburg University, the Netherlands. The Atlas presents European ideas and beliefs in the form of graphs, charts and maps. Values such as democracy, freedom, equality, human dignity and solidarity are held by almost all Europeans, but the survey points to differing views about marriage, religion, work and such topics as euthanasia, happiness, sexuality and death. This unique Atlas covers all European nations from Iceland to Turkey, from Portugal to the Ukraine. It graphically illustrates the rich diversity that is Europe.
