Knight-Swift acquires AAA Cooper, enters LTL market

New Holland farm machinery has won a deserved reputation for durability and reliability. If you're looking for agricultural products that will stand the test of time then look no further. The company ...

The shocking, three-decade story of A. Q. Khan and Pakistan's nuclear program, and the complicity of the United States in the spread of nuclear weaponry. On December 15, 1975, A. Q. Khan-a young Pakistani scientist working in Holland-stole top-secret blueprints for a revolutionary new process to arm a nuclear bomb. His original intention, and that of his government, was purely patriotic-to provide Pakistan a counter to India's recently unveiled nuclear device. However, as Adrian Levy and Catherine Scott-Clark chillingly relate in their masterful investigation of Khan's career over the past thirty years, over time that limited ambition mushroomed into the world's largest clandestine network engaged in selling nuclear secrets-a mercenary and illicit program managed by the Pakistani military and made possible, in large part, by aid money from the United States, Saudi Arabia, and Libya, and by indiscriminate assistance from China. Based on hundreds of interviews in the United States, Pakistan, India, Israel, Europe, and Southeast Asia, Deception is a masterwork of reportage and dramatic storytelling by two of the world's most resourceful investigative journalists. Urgently important, it should stimulate debate and command a reexamination of our national priorities.

This book scrutinizes the last 15 years of exceptional growth in the Turkish economy, and presents a model for sustainable ongoing growth that has particular implications for other key emerging economies. The growth of the Turkish economy in the 2000's was based on two integrated fundamental factors: fixing deteriorating dynamics and implementing further reforms to stimulate economic activity. This basic formula led to pleasing rates of economic growth, fuelled particularly by domestic private investments along with revived consumption and exports. Driven by political stability established by single party governments in the post-2002 period, an improved economic outlook helped Turkey enjoy record levels of foreign investment, adding momentum to its growth story. The Turkish experience in the post-crisis period implies that in order to achieve a fast and - more importantly - sustainable onward growth, the economy needs a new generation of structural reforms that simultaneously heal fragility and vitalize economic activity. The papers in this book offer professional assessments and assistance - especially for policymakers, and present a new direction upon which the Turkish economy - and emerging markets - can progress successfully for a further 15 years.

'Healthy mental, emotional, and behavioral (MEB) development is a critical foundation for a productive adulthood. Much is known about strategies to support families and communities in strengthening the MEB development of children and youth, by promoting healthy development and also by preventing and mitigating disorder, so that young people reach adulthood ready to thrive and contribute to society. Over the last decade, a growing body of research has significantly strengthened understanding of healthy MEB development and the factors that influence it, as well as how it can be fostered. Yet, the United States has not taken full advantage of this growing knowledge base. Ten years later, the nation still is not effectively mitigating risks for poor MEB health outcomes: these risks remain prevalent, and available data show no significant reductions in their prevalence. Fostering Healthy Mental, Emotional, and Behavioral Development in Children and Youth: A National Agenda examines the gap between current research and achievable national goals for the next ten years. This report identifies the complexities of childhood influences and highlights the need for a tailored approach when implementing new policies and practices. This report provides a framework for a cohesive, multidisciplinary national approach to improving MEB health'--Publisher's description

A 'Sonderforschungsbereich' (SFB) is a programme of the 'Deutsche Forschungsgemeinschaft' to financially support a concentrated research effort of a number of scientists located principally at one University, Research Laboratory or a number of these situated in close proximity to one another so that active interaction among individual scientists is easily possible. Such SFB are devoted to a topic, in our case 'Deformation and Failure in Metallic and Granular Materials', and financing is based on a peer reviewed proposal for three (now four) years with the intention of several prolongations after evaluation of intermediate progress and continuation reports. An SFB is terminated in general by a formal workshop, in which the state of the art of the achieved results is presented in oral or I and poster communications to which also guests are invited with whom the individual project investigators may have collaborated. Moreover, a research report in book form is produced in which a number of articles from these lectures are selected and collected, which present those research results that withstood a rigorous reviewing process (with generally two or three referees). The theme deformation and failure of materials is presented here in two volumes of the Lecture Notes in Applied and Computational Mechanics by Springer Verlag, and the present volume is devoted to granular and porous continua. The complementary volume (Lecture Notes in Applied and Computational Mechanics, vol. 10, Eds. K. HUTTNER & H.

Pocket Nature Guide: Rocks and Minerals is a practical, concise field guide to the world's rocks and minerals, packed with stunning photography and expert information. The 325 most commonly encountered species are given full or half-page coverage. Each entry includes a large, character full photographic image, supporting photographic images to show important variations, and a data panel to consistently summarize key facts. A simple text profile picks out the most useful details to aid identification and provides interesting background information.

This report aims to accelerate climate change adaptation implementation in fisheries management throughout the world. It showcases how flexibility can be introduced in the fisheries management cycle in order to foster adaptation, strengthen the resilience of fisheries, reduce their vulnerability to climate change, and enable managers to respond in a timely manner to the projected changes in the dynamics of marine resources and ecosystems. The publication includes a set of good practices for climate-adaptive fisheries management that have proven their effectiveness and can be adapted to different contexts, providing a range of options for stakeholders including the fishing industry, fishery managers, policymakers and others involved in decision-making. These good practices were linked to one or more of the three common climate-related impacts on fisheries resources: distributional change; productivity change; and species composition change. Therefore, these three impacts can serve as practical entry points to guide decision-makers in identifying good practice adaptation measures suitable for their local contexts. These good practices are based upon transferable experiences and lessons learned from the thirteen case studies across the globe and hopefully will contribute to greater uptake and implementation of climate-adaptive fisheries management measures on the ground.
