Arrow - Iowa State University
Most boomerang paper airplanes fly in a tight radius and are only a maximum of 10-15 feet away from you when they are on the far side of their circular flight. Circuit Racer, on the other hand, has a flight radius about 2-3 times that size, so it spends much more time in the air before returning to you, offering a much more satisfying experience than other such planes.

Circuit Racer | Glider Paper Airplne | Foldable Flight
WW2 crafts for kids, such as this Lancaster Bomber Paper Model, are a fantastic tool that you can use to teach children about the war, the types of aircraft that was used, and their names. Making models and getting hands-on with crafts is a great way to engage the kinaesthetic learners in your class and they're just a fun (and educational) activity to do overall! You and your ...
