The only real events I can think of that are directly related to the moon's phases are tides and eclipses. The likelihood of higher tides is greater when the moon is new. Lunar eclipses only occur...

What causes phases of the moon eclipses and tides? - Answers

Fast Facts What are lunar phases and eclipses? The moonlight we see on Earth is sunlight reflected off the Moon's grayish-white surface. The amount of Moon we see changes over the month — lunar phases — because the Moon orbits Earth and Earth orbits the Sun. Everything is moving. During a lunar eclipse, Earth comes between the Sun and the Moon, blocking the sunlight falling on the Moon.
