This inspirational book blends elements of shamanism with inherited traditions and contemporary religious commitments. Drawing on shamanic practices from the world over, SHAMANISM AS A SPIRITUAL PRACTICE FOR DAILY LIFE addresses the needs of contemporary people who yearn to deepen their own innate mystical sensibilities. This inspirational book shows how to develop a personal spiritual practice by blending elements of shamanism with inherited traditions and current religious commitments. Contents include: The central role of power animals and spirit teachers. Visionary techniques for exploring the extraordinary in everyday life. Elements of childhood spirituality including songs, secret hiding places, power spots, and imaginary power figures. A journey to an ancestral shaman to recover lost knowledge.

"The book you are holding will fundamentally change the way you look at the collection, compartmentalization, analysis, distribution, application, and protection of intelligence in your business. J. C. Carleson's presentation of years of spy tradecraft will make you a more effective force within your organization." -James Childers, CEO, ASG Global, Inc. When J. C. Carleson left the corporate world to join the CIA, she expected an adventure, and she found it. Her assignments included work in Iraq as part of a weapons of mass destruction search team, travels throughout Afghanistan, and clandestine encounters with foreign agents around the globe. What she didn't expect was that the skills she acquired from the CIA would be directly applicable to the private sector. It turns out that corporate America can learn a lot from spies-not only how to respond to crises but also how to achieve operational excellence. Carleson found that the CIA gave her an increased understanding of human nature, new techniques for eliciting information, and improved awareness of potential security problems, adding up to a powerful edge in business. Using real examples from her experiences, Carle-son explains how working like a spy can teach you the principles of: Targeting-figuring out who you need to know and how to get to them Elicitation-a subtle way to get the answers you need without even asking a question Counterintelligence-how to determine if your organization is unwittingly leaking information Screening-CIA recruiters' methods for finding and hiring the right people The methods developed by the CIA are all about getting what you want from other people. In a business context, these techniques apply to seeking a new job, a promotion, a big sale, an advantageous regulatory ruling, and countless other situations. As Carleson writes, "In a world where information has a price, it pays to be vigilant." Her book will show you how.

A study of modulated coding (MC), a technique for intersymbol interference (ISI) mitigation. It discusses MC when the ISI is known at both transmitter and receiver, and when only the receiver knows the ISI. It showcases polynomial antiquity resistant modulated coding, and provides an examination of transmitter-assisted ISI equalization.

THE FIRST ORIGINAL NOVEL TO TIE-IN WITH THE HIT US SHOW, INSPIRED BY THE GRIMM BROTHERS' CLASSIC FAIRY TALES! Back in the 19th century a Wesen and a Grimm fight to the death. The Grimm wins, but the Wesen's son escapes and vows revenge. In the present day, Captain Renard sends Nick and Hank to investigate an international crime cartel named Le Touche Givre (The Icy Touch). They discover this deadly gang is run by Wesen, and is involved in various illegal activities, including forced prostitution and drug pushing. As they close in on the gang, Nick begins to realise that their charismatic and dangerous leader is just as intent on tracking him down.

One of the major achievements in computational fluid dynamics has been the development of numerical methods for simulating compressible flows, combining higher-order accuracy in smooth regions with a sharp, oscillation-free representation of embedded shocks methods and now known as "high-resolution schemes". Together with introductions from the editors written from the modern vantage point this volume collects in one place many of the most significant papers in the development of high-resolution schemes as occurred at ICASE.

Intended for mature readers due to sexual content and language While fashion design major Caroline Hunter may have been born economically unlucky, in college, she's been lucky in love. Until her senior year at Southern University. She's gone from a serious long term boyfriend to a string of crappy dates. Then she meets mathematics grad student Reed Pendergraft. Reed is everything she's not looking for. Serious. Headed for a low paying university job. Boring. Caroline spent the first eighteen years of her life wondering where her next meal was coming from. She sure wasn't getting trapped in that life again with a man living on a professor's salary. An encounter with Reed in a club proves she might have pegged him wrong. He brings out a lusty side she never knew she had. But just when she's about to give in to her hormones, Reed makes a fool out of her. When she shows up for the first committee meeting for Southern University's Fall fashion show, a fundraiser for underprivileged kids, Caroline's horrified to discover the insufferable Reed is the committee chairman. While she refuses to tolerate his totalitarian rule of the committee, she's not sure she'll survive the month with her heart-and her pride-intact. Just when she thinks she has everything figured out, she finds that her entire life has been redesigned, thanks to Reed Pendergraft.

**** Redesigned is a lovely surprise in all the best ways - how quickly you'll fall for the characters, their unstoppable chemistry, and the ability of their story to take you from laughing to crying and back again. Denise has hit the New Adult nail on the head with this one, and I loved every single page! Lyla Payne, author of Broken at Love, USA Today bestseller The title of this book is apropos on several levels; not only does it fit the story, but it serves to express the way in this book is major leap forward for the author. She didn't merely write the next book in the series, she pushed forward and took risks, redesigned her approach to the story she was telling. Bravo, and I can't wait for more. Jasinda Wilder, author of Falling Into You, New York Times and USA Today bestseller

This edited monograph brings together research papers covering the state of the art in cloud computing for logistics. The book includes general business object models for intralogistics as well as user-friendly methods for logistics business process design. It also presents a general template for logistics applications from the cloud. The target audience primarily comprises researchers and experts in the field, but the book will also be beneficial for graduate students.
