best-selling World History in Documents was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of World History in Documents especially timely. In

addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.

With 83 additional outline and four-color maps, World Civilizations: The Global Experience, Fifth Edition, Atlas Edition, helps students with geography, one

of the most difficult aspects of World history courses for many. The maps are accompanied by review questions that call on students to identify important geographical areas and think critically about the connection between geography and historical events. The maps are on perforated pages and are organized by chapter so that they can be assigned easily and collected. The primary goal of World Civilizations is to present a truly global history—since the development of agriculture and herding to the present. Using a unique periodization, this book

divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies. Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. World Civilizations balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

World Civilizations, AP® Edition encourages students to grasp concepts and patterns across a huge breadth of time and space and helps to facilitate global understandings and connections in the classroom. This text captures a truly global approach by discussing and comparing major societies and focusing on their interactions. World Civilizations, AP® Edition presents a clear factual framework while stimulating analysis about global contacts, regional patterns, and the whole process of change and continuity on a

world stage. This text identifies six periods in world history. Each period is determined by three basic criteria: a geographical rebalancing among major civilizational areas, an increase in the intensity and extent of contact across civilizations (or, in the case of the earliest period, crossregional contact), and the emergence of new and roughly parallel developments in many major civilizations. Based on "comparative work and focuses on global processes," this text helps students see the history of the world as one based on multiple disciplines. -

Western civilization and world history are often seen as different, or even mutually exclusive, routes into historical studies. This volume shows that they

can be successfully linked, providing a tool to see each subject in the context of the other, identifying influences and connections. Western Civilization in World History takes up the recent debates about the merits of the well-established 'Western civ' approach versus the newer field of world history. Peter N. Stearns outlines key aspects of Western civilization - often assumed rather than analyzed - and reviews them in a global context.

Yet another general history of the world from the earliest humans through to

the modern period. This book approaches world history from a purely social perspective assessing aspects such as 'patterns of birth and death, basic value systems, relationships with government, interaction between men and women, and how people work and play'. Arranged chronologically, the chapters cover all major areas including Europe, Africa, Asia and the Americas, and address key themes in the development of societies and civilisations: population patterns, religion, gender and work relationships, material culture and social activities. The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the

Industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The
