For thirty years, Richard "The Iceman" Kuklinski led a shocking double life, becoming the most notorious professional assassin in American history while happily hosting neighborhood barbecues in suburban New Jersey. Richard Kuklinski was Sammy the Bull Gravano’s partner in the killing of Paul Castellano, then head of the Gambino crime family, at Sparks Steakhouse. By his own estimate, he killed over two hundred men, taking enormous pride in his variety and ferocity of technique. This trail of murder lasted over thirty years and took Kuklinski all over America and to the far corners of the earth, Brazil, Africa, and Europe. Along the way, he married, had three children, and put them through Catholic school. His daughter’s medical condition meant regular stays in children’s hospitals, where Kuklinski was remembered, not as a gangster, but as an affectionate father, extremely kind to children. "I Heard You Paint Houses" will soon be a major motion picture directed by Martin Scorsese. The working title for the movie is "The Irishman". The first words Jimmy Hoffa ever spoke to Frank "the Irishman" Sheeran were, "I heard you paint houses." To paint a house is to kill a man. The paint is the blood that splatters on the walls and floors. In the course of nearly five years of recorded interviews Frank Sheeran confessed to Charles Brandt that he handled more than twenty-five hits for the mob, and for his friend Hoffa. Sheeran learned to kill in the U.S. Army, where he saw an astonishing 411 days of active combat duty in Italy during World War II. After returning home he became a hustler and hit man, working for legendary crime boss Russell Bufalino. Eventually he would rise to a position of such prominence that in a RICO suit then-U.S. Attorney Rudy Giuliani would name him as one of only two non-Italians on a list of 26 top mob figures. When Bufalino ordered Sheeran to kill Hoffa, he did the deed, knowing that if he had refused he would have been killed himself. Sheeran’s important and fascinating story includes new information on other famous murders including those of Joey Gallo and JFK, and provides rare insight to a chapter in American history. Charles Brandt has written a page-turner that has become a true crime classic.

The powerful true-life story of a Brazilian boy who could have been a fisherman but instead became the biggest professional killer known to the world—soon to be a major motion picture. Julio Santana as seen through the eyes of acclaimed investigative reporter Klester Cavalcanti is not a monster--he is a loyal son, a family man, a devout Christian who is tormented by his conscience with every shot. But in a cruel and lawless area of Brazil, where every life has its price, respect for life is a luxury that he can't afford. Trained by his uncle, an assassin, and initiated in murder at 17 years of age, Santana proved to be a natural. Without moralizing about mass murderer, The Name of Death attempts to show how such a career can be not so very different from other ordinary working lives. The portrait that emerges in this riveting narrative, based on seven years of phone conversations between Cavalcanti and Santana, is not only that of a man but also that of a country. Describing in detail only a handful of the almost 500 murders Santana carried out, Cavalcanti reveals just how lawless much of the interior of Brazil has been for the past 50 years. The state, the police, and the security forces play almost no part in establishing the rule of law--except when they are suppressing the guerrilla threat of the early 1970s. Cavalcanti shows just how easy it is for a boy like Julio to take the law into his own hands, and what a wild place Brazil has been and in many ways continues to be. The Name of Death is being adapted into a major motion picture produced by Fernando Meirelles (director of City of God, Blindness, and The Constant Gardener) and Globo Filmes, for release in Brazil in July 2017 and distribution in the U.S. the following year.

On November 8, 1985, 18-year-old Tom Odle brutally murdered his parents and three siblings in the small southern Illinois town of Mount Vernon, sending shockwaves throughout the nation. The murder of the Odle family remains one of the most horrific family mass murders in U.S. history. Odle was sentenced to death and, after seventeen years on death row, expected a lethal injection to end his life. However, Illinois governor George Ryan’s moratorium on the death penalty in 2000, and later commutation of all death sentences in 2003, changed Odle’s sentence to natural life. The commutation of his death sentence was an epiphany for Odle. Prior to the commutation of his death sentence, Odle lived in denial, repressing any feelings about his family and his horrible crime. Following the commutation and the removal of the weight of eventual execution associated with his death sentence, he was confronted with an unfamiliar reality. A future. As a result, he realized that he needed to understand why he murdered his family. He reached out to Dr. Robert Hanlon, a neuropsychologist who had examined him in the past. Dr. Hanlon engaged Odle in a therapeutic process of introspection and self-reflection, which became the basis of their collaboration on this book. Hanlon tells a gripping story of Odle’s life as an abused child, the life experiences that formed his personality, and his tragic homicidal escalation to mass murder, seamlessly weaving into the narrative Odle’s unadorned reflections of his childhood, finding a new family on death row, and his belief in the powers of redemption. As our nation attempts to understand the continual mass murders occurring in the U.S., Survived by One sheds some light on the psychological aspects of why and how such acts of extreme carnage may occur. However, Survived by One offers a never-been-told perspective from the mass murderer himself, as he searches for the answers concurrently being asked by the nation and the world.
