But life in the ocean is in trouble. The ocean is becoming hotter, more polluted, and, in places, empty of life. The right amount of warming is good for us, but too much warming is causing shifts that are not good for life in the ocean. Global warming, pollution, and overfishing are creating a New Ocean, in which life is changing drastically.

PUBLISHERS WEEKLY MAR 12, 2012. University of York marine conservationist Roberts (The Unnatural History of the Sea) offers an engrossing survey of the relationship between man and the sea for readers living through the greatest environmental changes in 65 million years. From the genesis of life four billion years ago to the increasingly empty dead zones of our planet's waters, Roberts details the interaction between the ocean and human evolution, food supply, cities, art, science, policy, ...
