This work is an examination of what makes us fat. In his book *Good Calories, Bad Calories*, the author, an acclaimed science writer argues that certain kinds of carbohydrates, not fats and not simply excess calories, have led to our current obesity epidemic. Now he brings that message to a wider, nonscientific audience. With fresh evidence for his claim, this book makes his critical argument newly accessible. He reveals the bad nutritional science of the last century, none more damaging than the "calories-in, calories-out" model of why we get fat, the good science that has been ignored, especially regarding insulin's regulation of our fat tissue. He also answers key questions: Why are some people thin and others fat? What roles do exercise and genetics play in our weight? What foods should we eat or avoid? Concluding with an easy-to-follow diet, this book is one key to understanding an international epidemic and a guide to improving our own health.

It's not all about what you eat, or when you eat it. It's not about the right combination of foods. With straightforward honesty, cardiologist Sal Tirrito lays out the facts about why you're fat and how to drop those pounds, permanently. If you're ready to stop making excuses and accept the laws of weight loss, you're ready to change your body permanently. It starts and ends with this law: don't eat more calories than you burn off. Sounds simple, and it is; but for millions of Americans, it's not easy. Dr. Tirrito offers facts, examples, stories, and data to help you make positive changes to your lifestyle. By following the simple steps outlined in this book, you can change your behavior and find the thinner, healthy person who has been hiding inside you all these years. About the Author Dr. Tirrito directs weight management and athletic performance clinics in Southern Arizona. He is

an authority on exercise physiology and sports nutrition and a frequent contributor to "Triathlete" magazine. In addition to running his clinic, Dr. Tirrito practices cardiology in Tucson, Arizona where he specializes in primary and secondary prevention of heart disease, advanced cardiovascular imaging, and vascular medicine. Food was once the providence of celebrated chefs and critical connoisseurs. Cooking shows featured all gourmet creations and web sites displayed artfully photographed delights. Then something changed. Perhaps it was the desensitizing of web culture or perhaps it was a cry for help from the food-loving public. But by God - there came a day when fancy vegetable towers came crashing down and \$50 mushrooms were no longer acceptable. Amason and Blakley wanted see the old stand-bys, the carnival foods of their childhoods, the sticky mess of a deep-fried candy bar, the indulgence of a greasy burger with all the fixins. It was the birth of the nasty food web-trend. And it was delicious. The website This is Why You're Fat is an ode to this trend - whether seen as a commentary on North American dietary habits or a celebration of the deliciously bad - Amason and Blakey are devoted to the world's newfound obsession with over-the-top food. Within its first month the site pulled in over ten million eye balls, and attracted major nation media including CNN. The world cooked, they listened. www.thisiswhyourefat.com

trainer to the stars—has the answer to the energy crisis in your life, and it's not in the next cup of coffee you're reaching for. Eight short stories and six personal essays sound off on body image, self-esteem, diets, eating disorders, and fashion magazines, in a volume that includes contributions by Carolyn Mackler, Daniel Pinkwater, and Megan McCafferty.

I swore I would never write a bullshit "self-help" book, and yet, here we are. Now, here's my painfully predictable "why this is different" pitch. This book will not feature some cookie-cutter diet that doesn't work. As a matter of fact, it won't feature a diet at all. Instead, it will teach you how your perception of the world is open for interpretation, and thus, the emotions you attach to it are pliable. The science on weight loss is already clear. We get it, and millions (ok,

maybe hundreds of thousands) execute it. Daily motivational quotes are encouraging, but without a plan or some intrinsic goal, they lack staying power. What's missing is an understanding of behavior and mindset--and how to manipulate these to accomplish your goals. So instead of another book on the ABCs of eating all your veggies, here's your baby-powder-laced slap to the face. Food owns you--and it's making you fat, depressed, and unhealthy. But it's behavioral, and this behavior can be reprogrammed. Time to unfuck your mind.

Not only will Tony have you laughing out loud while he reveals the secrets behind how the human body functions, you will also learn how to teach your clients to look at their own body chemistry to understand the underlying causes of a wide variety of health issues. Beyond learning how to create amazing results with your clients, you 'll also gain insights into methods that can take your business as a health professional to a whole new level.
